Colleges; Public Colleges; Racial Differences; Sex
Differences; *Universities
IDENTIFIERS *Graduation Rates; National Collegiate Athletic Association

ABSTRACT

This report provides data on graduation rates of student-athletes at National Collegiate Athletic Association (NCAA) Division I schools. Institution-specific reports for each of the 305 colleges and universities that returned surveys include graduation rates for all students enrolled in a full-time program for a degree and of student-athletes who either received athletic aid from the institution upon initial enrollment or who were offered aid but could not qualify for it because of the NCAA's initial-eligibility legislation. Each report provides graduation information for students and student-athletes entering in 1986-89, student-athlete admissions data for students entering in 1992-96, undergraduate enrollment data for all students entering in fall 1995, and standards for transfer student-athletes. Aggregate reports summarize overall graduation rates; Division I-A, I-AA, and I-AAA graduation rates; and public versus private school graduation rates. Sex-, race-, and sport-specific data are included in both the institutional and aggregate reports. (MDM)

1996 NCAA® Division I Graduation-Rates Report

Graduation-Rates Data (1986-87, 1987-88, 1988-89 and 1989-90 entering classes)

Undergraduate-Enrollment Data (Fall 1995)

Student-Athlete Admissions Data (1992-1995 entering freshmen classes)

GRADUATION-RATES REPORT INFORMATION

This information and the following graduation-rates reports have been prepared by the NCAA, based on data provided by member institutions, in compliance with NCAA Bylaw 30.1 and the Federal Student Right-to-Know and Campus Security Act. Each NCAA Division I member institution is required to distribute its individual report to prospective student-athletes and others, as specified in Bylaw 13.3.1.2.

Each individual report provides information about two groups of students at the institution identified at the top of the form: (1) all undergraduate students who were enrolled in a full-time program of studies for a degree and (2) student-athletes who either received athletics aid from the institution upon initial enrollment, or were offered aid but could not qualify for it because of the NCAA's initial-eligibility legislation. [Note: Athletics aid is a grant, scholarship, tuition waiver or other assistance from a college or university that is awarded on the basis of a student's athletics ability.]

Each individual report gives graduation information about students and student-athletes entering in 1986-89. These are the four most recent graduating classes for which the required six years of information is available. Each report provides information about student-athletes who received athletics aid in one or more of eight sports categories: football, men's basketball, baseball, men's track and field/cross country, men's other sports and mixed sports, women's basketball, women's track and field/cross country, and women's other sports. For each of those sports categories, each report includes information in six self-reported racial or ethnic groups: American Indian or Alaska Native, Asian or Pacific Islander, Black, Hispanic, White, and Other (not included in one of the other five groups or not available) and the total (all six groups combined).

A graduation rate (percent) is based on a comparison of the number (N) of students who entered a college or university and the number of those who graduated within six years. For example, if 100 students entered, and 60 graduated within six years, the graduation rate is 60 percent. It is important to note that graduation rates are affected by a number of factors: some students may work part-time and need more than six years to graduate; some may leave school for a year or two to work or travel; some may transfer to another college or university; or some may be dismissed for academic deficiencies.

Three measures of graduation rates are presented in each report: (1) freshman-cohort rate, (2) transfer-cohort rate, and (3) exhausted-eligibility rate. The freshman-cohort

rate indicates the percentage of freshmen who entered during a given academic year and graduated within six years. The transfer-cohort graduation rate is calculated only for those student-athletes who transferred to an institution, and indicates the percentage of transfer student-athletes who graduated within six years of the entering class to which they were assigned. The exhausted-eligibility rate indicates the percentage of student-athletes who used all of their athletics eligibility at the institution and who had graduated by August 1995.

1. Graduation-Rates Data.

The box at the top of each graduation-rates report provides freshman-cohort graduation rates for all students and for student-athletes who received athletics aid at the college or university.

1-a. All Students. Provides the freshman-cohort graduation rates for all full-time degree-seeking students by race or ethnic group. It shows the rate for men who entered as freshmen in 1989-90, and the four-year average, which includes those who entered as freshmen in 1986-87, 1987-88, 1988-89 and 1989-90. The same rates are provided for women. The total for 1989-90 is the rate for men and women combined, and the four-year average is for all students who entered in 1986-87, 1987-88, 1988-89 and 1989-90.

1-b. Student-Athletes. Provides the freshman-cohort graduation rates and also the transfer graduation rates for student-athletes in each race and ethnic group who received athletics aid. Transfer rates include student-athletes who, based upon the number of credits accepted by the institution, were placed in the entering classes of 1986-87, 1987-88, 1988-89 or 1989-90.

1-c. Student-Athletes by Sports Categories. Provides the identified graduation rates as in 1-b for each of the eight sports categories. (The small letters indicate the value of N.)

1-d. Graduation Rates of Those Exhausting Eligibility. Provides the graduation rates of student-athletes who entered during the 1983-1989 academic years and exhausted their eligibility at the institution. The rate indicates the percentage who had graduated by August 1995.

1-e. Average Time Required for Graduation. Indicates the average number of years it took all students and student-athletes to graduate. The calculation is based on those freshmen who entered during the 1983-1989 academic years and graduated within ten years or by August 1995.

1-f. Five Most Common Degree Programs at Graduation. Identifies the five most common programs (majors) of student-athletes who entered in 1986-87, 1987-88, 1988-89

and 1989-90, and graduated within six years.

2. Student-Athlete Admissions Data. (Four-Year Average for Entering Freshmen, Classes of 1992-93, 1993-94, 1994-95 and 1995-96.)

2-a. High-School Preparation Data. Provides core grade-point averages and test scores for student-athletes.

Average high-school CGPA (core grade-point average) shows the GPAs these freshmen earned in a core curriculum of academic courses. The core curriculum includes a minimum of four years of English, two years of mathematics, two years of social science, and two years of natural or physical science, with at least one lab course, if the high school offers one.

Average SAT (Scholastic Aptitude Test) and average ACT (American College Testing program) scores indicate the average test scores for student-athletes within each sport group. On the SAT, the highest possible composite score (combination of math and verbal scores) is 1600. On the ACT, the highest possible score is 36.

3. Undergraduate Enrollment Data. (All students enrolled fall 1995-96)

3-a. All Students. Indicates the number of full-time undergraduate students enrolled for the 1995 fall term and the number of men and women in each racial or ethnic group.

3-b. Student-Athletes. Identifies how many student-athletes were enrolled for the 1995 fall term and the number of men and women in each racial or ethnic group.

3-c. Student-Athletes by Sports Categories. Provides the enrollment data as identified in 3-b for each of the eight sports categories.

4. Standards for Transfer Student-Athletes.

These are standards that an institution uses to determine placement of transfer student-athletes in the appropriate class. For purposes of this report, there are two sets of standards: (1) standards that are the same as the NCAA minimums set forth in Bylaw 14.5 or (2) standards that exceed those specified minimums.

4. STANDARDS FOR TRANSFER STUDENT-ATHLETES #

This institution's standards are the same as the NCAA minimums.
Only student-athletes receiving athletics aid are included in this report.

INTRODUCTION TO AGGREGATE REPORTS

The following reports are summaries of the data collected from Division I member institutions and contained in the graduation-rates disclosure form. These tables have been created to provide meaningful summaries of the graduation-rates and enrollment data that Division I institutions have provided to the NCAA. The information contained provides comparisons between students and student-athletes, and gender and racial groups. It also provides an overall look at the different sports categories included in the reports.

These reports have been divided into 10 categories that are groups of similar institutions. The categories are based on NCAA subdivision, size of institution and whether the institution is public or private. The categories are meant to reflect differences in institutional sizes and missions, and to place institutions with similar philosophies together.

The data included in these tables are sums of all data collected from institutions in a given category. In all cases, the columns labeled "N" in the following tables relate the total number of students within a reporting cell that were included in the group of institutions in question (e.g., in Division I there were 1,719 white football players who entered school in 1989). The test scores and core grade-point averages that are provided in the admissions-data section are four-year averages for the category.

The first table in the series presents data for the 305 Division I institutions that returned the graduation-rates disclosure form. The numbers in this table reflect the data about every institution that was included in the study.

The next three tables divide the institutions by NCAA Division I subdivisions, based upon the football programs that exist at these institutions. There are 108 Division I-A members, 119 Division I-AA respondents and 78 Division I-AAA members included.

The next three reports detail the data for the public schools that are members of Division I. The first of these reports contains data for all public institutions in the division. The next two reports divide the public institutions into two categories: large and small. These categories were created by looking at 1995-96 enrollment for all 202 public institutions, and placing the half with the higher enrollments in the large category, and the half with the smaller enrollments in the small category. The dividing point for public institutions was a reported enrollment of approximately 10,500.

The final three tables provide similar data for all private schools within Division I. Again, the first table presents data for the entire group (g=103) of private institutions. The final two charts divide the private institutions into large and small groups using the same methodology as was used for the public institutions. The dividing point for private institutions was an enrollment of approximately 3,500 individuals.

It is hoped that these data will provide useful information about the graduation rates and enrollment at NCAA Division I institutions. It is also hoped that institutions will be able to use this information to compare themselves with other similar institutions.
